FLO AirFilter Applications

All FLO® Air Filters include 1 pair of gloves & 2 Foam Filterskins

PC Racing's new FLO® X Filters have a patent-pending design that includes two Foam Filterskins®. The main filter incorporates a bonded two layer precision foam and proper density for maximum performance and filtration. Additionally, FLO® X Air Filters now come with 2 foam Filterskins® to make the task of cleaning the filter as easy as peeling off the dirty Filterskin®! It is like having 3 filters in one, and you don't have to loosen the wing nut to remove the Filterskin®. Additionally, the foam Filterskin® fits tight and is very thin and porous so that air flow is not restricted. With 3 uses out of one FLO® X Air Filter, riders don't have to sacrifice quality for convenience as the main filter and Foam Filterskins® are made with the highest quality materials to last for years.

FLO DUAL STAGE FILTERS

From everyday riding to the most adverse conditions nature can dish out, you want engine protection you can count on. The FLO line of air filtration products will provide your motorcycle with maximum intake protection... day in and day out.

- 1 Coarse open-pore catches airborne dirt, grime and sand.
- 2 Fine open-pore inner foam acts as a second filter to trap the smallest particles while ensuring maximum air passage.
- 3 Exclusively formulated adhesive withstands repeated cleanings, even with harsh solvents and biodegradable oils/cleaners.
- 4 Thick, flat foam sealing ring ensures maximum contact with your airbox, while acting as a breathable gasket for increased air passage.
- 5 Fused outer and inner elements prevent dirt and grime from being lodged between layers.

ProSeal - FLO Air Filter seals

Tired of the hassle and mess of air filter grease? PC Racing's Pro-Seal is the answer for a perfect filter to air box seal without the use of messy grease. This neoprene gasket adheres to the rim** inside the motorcycle's air box. The neoprene material creates a larger sealing surface and has memory for a perfect seal time after time. Due to the adhesives that are not affected by gas and oils, the Pro-Seal will not separate from the air box once installed. The Pro-Seal is available for most offroad motorcycles.

** Some applications do not have a rim.

Cleaning Instructions:

Thoroughly clean the rim with a strong degreaser to remove all oil and grease residue.

1. Make sure the rim is clean
2. Peel backing paper off the Pro-Seal
3. Lightly align the Pro-Seal
4. Once the Pro-Seal is aligned, press firmly for a perfect fit.

FILTERSKINS®

FILTERSKINS are an extremely thin but durable air filter cover that, when oiled, allow maximum airflow while trapping 90% of the dirt. QR FILTERSKINS have a special sewn in tab and drawstring that runs to a velcro tab on the rear fender. Midpoint through a dusty or wet race, a slight tug on the velcro tab will clean the air filter by removing the FILTERSKIN from the air filter. This is done without removing the seat and eliminates the problems associated with a dirty and possibly clogged air filter. QR FILTERSKINS are reusable and can be used with most foam air filters that install with a wing nut

DIRECTIONS: Completely saturate the FILTERSKIN with a suitable air filter oil and squeeze out the excess oil. Stretch an oiled FILTERSKIN over a clean, oiled air filter. Attach the velcro right behind the seat on the rear fender. Cut and tie the appropriate length of string from the tab on the FILTERSKIN to the velcro.

Clean FILTERSKINS with solvent, followed by soap and water.

Application: Most foam and gauze air filters off road motorcycles, ATV's, & Karts

Part No	Common applications	Dia mm	Length mm
PC1344	Small & short filters/short "clamp on" & Pod/KX/RM60	75 to 100	75 to 100

Road - Washable Resuable Oil Filters - Stainless Steel

Superior Filtration

This should be the last oil filter you will ever buy! Made from laser cut, medical grade, 304 stainless steel micronic filter cloth, this filter provides 200% more filter area in many cases. Our stainless filter catches items down to 35 microns, which is about 3 times better than most good paper or brass filters. Unlike glued paper filters, the FLO Oil Filter pleat seam is welded and able to withstand up to 300 degrees Celsius.

This high tech filter technology is widely used in all types of auto racing including, Indy, Nascar, F1.

In addition to all the other benefits, our filter helps keep land fill sites free of used filters.

Cleaning

Note the original filter position to ensure correct installation.

Clean filter at each oil change with solvent, contact cleaner, kerosene, or any other degreasing agent. Blow air through the filter from the inside out to remove any small particles or cleaning agent from the screen. Lube rubber parts with clean oil before installation.

1. Consistent filtering across the entire surface and a flow rate nearly 7 times greater than paper filters.

2. Magnetic Pre-filtering

3. Billet aluminum filter case doubles as an oil cooler

4. Progressive rate bypass combined with high flow characteristics of the filter media avoids unfiltered oil bypassing the filter during cold startup and high rpm

5. Drilled wrench nut allows for easy removal and safety wire required at most race tracks

Off Road FLO Oil Filter Washable - Reusable

Superior Filtration

This should be the last oil filter you will ever buy! Made from laser cut, medical grade, 304 stainless steel micronic filter cloth, this filter provides 200% more filter area in many cases. Our stainless filter catches items down to 35 microns, which is about 3 times better than most good paper or brass filters. Unlike glued paper filters, the FLO Oil Filter pleat seam is welded and able to withstand up to 300 degrees Celsius.

Consistent flow under all conditions:

This filter maintains consistent flow under all conditions including extreme heat, the presence of water, and cold start ups where paper filters can flow so poorly that they often cause the bypass valve to open and allow unfiltered oil to circulate in the engine!

This high tech filter technology is widely used in all types of auto racing including NASCAR, Indy type cars, Formula 1 and in the Aerospace industry where high quality filtration is of the utmost importance.

In addition to all the other benefits, our filter helps keep land fill sites free of used filters.

Cleaning Instructions:

Note the original filter position to ensure correct installation. Clean filter at each oil change with solvent, contact cleaner, kerosene, or any other degreasing agent. Blow air through the filter from the inside out to remove any small particles or cleaning agent from the screen. Lube rubber parts with clean oil before installation.

Gear Shifter Skin

Tired of shoe scuffs from your gear shift?

ShifterSkin is made of washable neoprene, which keeps your shoes looking good.

Simply slide the ShifterSkin on and say goodbye to ugly shifter marks on your shoes!

Description	Part No
ShifterSkin Black	PCSSBlack
ShifterSkin Grey	PCSSGrey
ShifterSkin Black Harley Davidson	PCSSHD

Fitting Guide

PCSS	Most sport, mini bikes and ATV with gear lever 38 to 60mm
PCSHD	For Harley Davidson and bikes with larger gear lever

Pull end open and slide on

Pull end and push/twist closed end

This ShifterSkin is design for most Cruiser motorcycles with larger shift pegs from 2.5 to 3.5 inches long.
